

Wetlands

Common species in wetland areas (highly localised; species will depend on surrounding ecosystem type and hydrology):

tī kōuka

rushes

harakeke

purei

toetoe

raupō

Wetlands are highly specialised ecosystems.

For specific wetland restoration guidelines, see the Manaaki Whenua | Landcare Research Wetland Restoration handbook: <https://www.landcareresearch.co.nz/publications/wetland-restoration>

Alternatively, please contact Horizons for advice.

Possible species (for bare, wet sites):

Toetoe
Austroderia toetoe

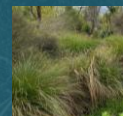

Kahikatea
Dacrydium dacrydioides

Rautahi | cutty grass
Carex geminata

Mānuka
Leptospermum scoparium

Purei | pukio
Carex secta

Twiggy tree daisy
Olearia virgata

Mingimingi
Coprosma propinqua

Harakeke | flax
Phormium tenax

Tī kōuka | cabbage tree
Cordyline australis

Horoeka | lancewood
Pseudopanax crassifolius
